Allowable Subject Matter

1. Claims 32-41 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding independent claim 32, the prior art of record neither shows nor suggest a method of forming microstructures on a substrate, comprising: providing a substrate comprising a plurality of electrodes patterned on at least one surface of the substrate, placing a slurry comprising a mixture of a ceramic powder containing TiO₂ and a curable fugitive binder between the at least one surface of the substrate and a patterned surface of a mold, wherein the patterned surface of the mold comprises a plurality of microstructures, and further wherein the plurality of microstructures are aligned with the plurality of electrodes patterned on the at least one surface of the substrate, along with the other limitations of the claim.

Regarding independent claim 41, the prior art of record neither shows nor suggest a method of forming microstructures on a substrate, comprising: providing a substrate comprising a pattern; providing a mold comprising a microstructured surface, wherein the substrate and the mold further comprise mutual interlocking features such that when the mold is placed over the substrate with the respective mutually interlocking features mated, the microstructured surface of the mold is desirably aligned with the pattern of the substrate along with the other limitations of the claim.
